

## Mario Kart Wii: *Young people's reviews*

This (not so) classic racing game is a good multi player game with a variety of good courses and characters to choose from. As well as all the usual characters you can also put yourself into the race using your "Wii Mii". As usual races are categorised into 50cc, 100cc and 150cc – featuring karts, bikes and even both at the same time. The innovative steering technique with the Wii wheel just adds to the sheer awesomeness of this game. Some people may believe that this over-simplifies the game however i believe that it just adds to the excitement of the game. I recommend this game to anyone.

My Rating = 9/10

Mario karts is another Mario universe themed game were there is 12 players on the racing car circuit that all want to win the race. You can pick up multicoloured boxes with a question mark in it to get weapons. The lower the place you are in the race the better weapons/things you will get. Overall the game is best to play with friends.
